From: sagawa@nibh.go.jp (Ken Sagawa)
Subject: a new reporter
Cc: Todd_Newman@cisnc.canon.com, Michael_Stokes@hp.com, naoya@devd.crl.sony.co.jp, ciecb@ping.at

To: CIE D1 Members, TC Chairman, Reporters and Liaison officers

This is to inform you the evaluation of a letter ballot for a new reporter on "Effect of ambient light on color appearance of soft copy images" proposed by N. Katoh (Sony. Co. in Japan), which was conducted in June-July 1998.

A total of 13 ballots were received from 39 country members. Twelve were in favor and one against with comments. As some of the comments were technical, they were informed to the proposer, and an immediate response was obtained in which the comments were seriously investigated in order to be reflected into the working program. Consequently, Division 1 establishes this reporter.

However, the same subject has been discussed as a new work item in Division 8 "Imaging technology" which will probably be started formally in coming October. As this subject is more suitable for being handled in the new Division, Division 1 would transfer this reporter to Division 8 at an appropriate time, if Division 8 agrees.

Thanks for your consideration and voting.

Sincerely yours,

Ken Sagawa,
Director Division 1
