

CIE TC8-10 Minutes of 8 November Meeting

These are much abbreviated minutes, because there was no one officially taking notes. The meeting began with a quick review of the goals, plans, and current state of work for the Division. This was presented as a slide deck by Todd from the podium. After that, a discussion was held while people signed up to participate in the experiment. Several good ideas were raised by the attendees. However, these were not recorded by Todd, as he was moderating the meeting. Those who proposed ideas are hereby requested to repeat them on-line so that we can discuss them within the TC.

The following volunteers joined, either during the meeting or in subsequent communications with the TC chair:
